USD 505 Superintendent of Schools

USD 505 Capacities

The following capacities indicate the threshold to which the district will accept out-of-district students. These levels are indicative of our commitment to student success in a class size most conducive to learning. In times when the district has class sizes below capacity, the district will use a lottery system to allow out of district students an opportunity for enrollment.

District capacities will not have an impact on currently enrolled out-of-district students.

Capacities for both the Chetopa and Saint Paul Campuses are the same. These capacity limits allow for a 7% growth without having to hire additional teachers. Our district has experienced declining enrollment for the last 6 years.
